

BASE PLATE BICYCLE RAIL: BRB2 RANGE

(Stainless Steel range shown)

COMMONLY USED:

- Residential properties
- Commercial properties
- Schools
- Recreational parks
- Railway stations
- Street scape

Supamaxx Base Plate BRB2 Bicycle Rails allows for the securing of 1 or 2 bicycles per rail and the versatility of installing multiple rails in various combinations to cater for larger bicycle areas.

This very popular bicycle rail design supports the bicycle frame and allows the owner to secure frame and wheels using their own locks. All of Supamaxx bicycle rails meet Australian Standards A.S. 2890.3 and can be used towards Green Star points.

The BRB2 range of rails are manufactured in Australia using 40NB pipe and are hot dipped galvanised or 316 Stainless Steel making them a far superior to many of our competitors imported products. The Supamaxx rail is fully welded and delivered as one piece, making it stronger and not requiring assembly.

PRODUCT CODE	BRB201	BRB206
FIXINGS (Not Included)	4 x M10	4 x M10
HEIGHT (Above Ground)	800mm	800mm
OVERALL WIDTH	850mm	850mm
PIPE DIAMETER	48.30mm	48.26mm
MATERIAL	Mild Steel Pipe	Grade 316 Stainless Steel
FINISH	Hot Dipped Galvanised	Level 4 Linished

Installation requires the rail to be mounted to a concrete surface using the appropriate security sheer nut masonry anchors to secure the rail. Base plate mounted bicycle rails are often used as they are simple to install and ideal when core drilling and concrete footing are not possible. Supamaxx offers a wide range of robust, versatile Bicycle Rails, Racks, Lockers and Cages.

Aesthetically appealing, functional and cost effective, Supamaxx provides a Bicycle Parking solution to meet all needs.

We recommend you always obtain tailored advice from one of our professional staff to ensure you purchase the most suitable product for your specific needs.

BENEFITS OF BICYCLE RAILS
