

COUNCIL SPEC MULTI BICYCLE RACK BRM4 RANGE

The Supamaxx™ Council Spec BRM4 Multi Bicycle Rack is the proven solution where multiple bicycle parking spaces are required in a compact space. A popular bike rack design, the Council Spec series offers an attractive, secure and versatile option that is designed for ease of use and installation. This multi system that can be installed for single or double sided access for maximum efficiency for both indoor and outdoor applications.

The Supamaxx Council Spec range of multi racks are manufactured in Australia using 50NB pipe with the option of hot dipped galvanised steel or Grade 316 Stainless Steel.

The maximum capacity for the Council Spec range will depend on how the rack is positioned. Each can be positioned to allow bikes to access the rack from a single side, or from both sides.

Double sided access allows 1 bike to be parked in each alternating bay and 1 bike on each outside end. Single sided access requires adequate space between multiple installation to give bicycles easier access.

Installation requires the rack to be mounted to a concrete surface using the appropriate security fixings to secure the rail. Supamaxx offers a wide range of robust, versatile Bicycle Rails, Racks, Lockers and Cages.

Aesthetically appealing, functional and cost effective, Supamaxx provides a Bicycle Parking solution to meet all needs.

COMMONLY USED:

- Residential Developments
- Schools
- Commercial Buildings
- Railway stations
- Carparks
