

CORNER GUARD: CGP800R: Flush Fit Rubber

The Supamaxx™ Corner Guard helps prevent costly damage to vehicles and buildings. This corner guard protector sits flush against the exposed corner, yet still provides a high level of absorption, minimising accidental structural damage. This is an ideal solution for car parks, warehouses and other applications where structural pillars and corners exist.

The Supamaxx Rubber Corner Guards are manufactured using 100% recycled rubber and come in 800mm high lengths. The Guards sides feature a highly visible Safety Yellow hazard pattern. 6 fixings are used to attach the protectors to the structure.

PRODUCT CODE	CGP800R
LENGTH	800mm
WIDTH	100mm
FIXINGS	6 X M8 X 65mm Bolts

We offer a complete installation service, Australia wide, or can assist you with advice on installation techniques for our product range. We recommend you always obtain tailored advice from one of our professional staff to ensure you purchase the most suitable product for your specific needs.
