

# CORNER GUARD: CGP800Y: Galvanised Steel Yellow

The Supamaxx™ Galvanised Corner Guard helps prevent costly damage to vehicles and buildings. This corner guard protector sits flush against the exposed corner, providing maximum protection and deflection on impact, minimising accidental structural damage. This is an ideal solution for car parks, loading docks, warehouses and other applications where structural pillars and corners exist.

The Supamaxx Galvanised Corner Guards are manufactured using 3mm powder coated galvanised steel and come in 800mm high lengths. The Protector is powder coated in Safety Yellow to increase visible. 6 fixings are used to attach the protectors to the structure.

PRODUCT CODE	CGP800Y
LENGTH	800mm
WIDTH	100mm
FIXINGS	6 X M8 X 65mm Bolts

We offer a complete installation service, Australia wide, or can assist you with advice on installation techniques for our product range. We recommend you always obtain tailored advice from one of our professional staff to ensure you purchase the most suitable product for your specific needs.
