

CORNER GUARD: CGP800G: Galvanised Steel

The Supamaxx™ Corner Guard helps prevent costly damage to vehicles and buildings. This corner guard sits flush against the exposed corner, providing maximum protection and deflection on impact, minimising accidental structural damage. This is an ideal solution for loading docks, warehouses and other applications where structural pillars and corners exist.

The Supamaxx Corner Galvanised Guards are manufactured using 3mm galvanised steel and come in 800mm high lengths. The Corner Guards galvanised surface is extremely durable and is ideal for areas where contact is more likely. 6 fixings are used to attach the protectors to the structure.

PRODUCT CODE	CGP800G
LENGTH	800mm
WIDTH	100mm
FIXINGS	6 X M8 X 65mm Bolts

We offer a complete installation service, Australia wide, or can assist you with advice on installation techniques for our product range. We recommend you always obtain tailored advice from one of our professional staff to ensure you purchase the most suitable product for your specific needs.
