

CORNER GUARD: CGP840RC: Rubber Cushion

The Supamaxx™ Corner Guard helps prevent costly damage to vehicles and buildings. What makes this particular corner guard protector different is its protruding design that creates a larger impact absorbing area, thus enabling the Corner Guard to act as a cushion when contact is made, minimising accidental structural damage. This is the ideal solution for car parks, warehouses and other applications where structural pillars & corners exist.

The Supamaxx Rubber Corner Guards are manufactured using 100% recycled rubber and come in 840mm high lengths. The Guards sides feature a highly visible Safety Yellow hazard pattern. 6 anchor bolts are used to attach the protectors to the structure.

PRODUCT CODE	CGP840RC
LENGTH	840mm
WIDTH	100mm
FIXINGS	6 X M8 X 100mm Bolts

We offer a complete installation service, Australia wide, or can assist you with advice on installation techniques for our product range. We recommend you always obtain tailored advice from one of our professional staff to ensure you purchase the most suitable product for your specific needs.
