

The Supamaxx™ Tyre Killer provides a soft approach solution to traffic management in a one-way area. It is a 1000mm heavy duty steel unit, that has been powder coated in 'Yellow.' It has a low profile to ensure adequate vehicle clearance when in use.

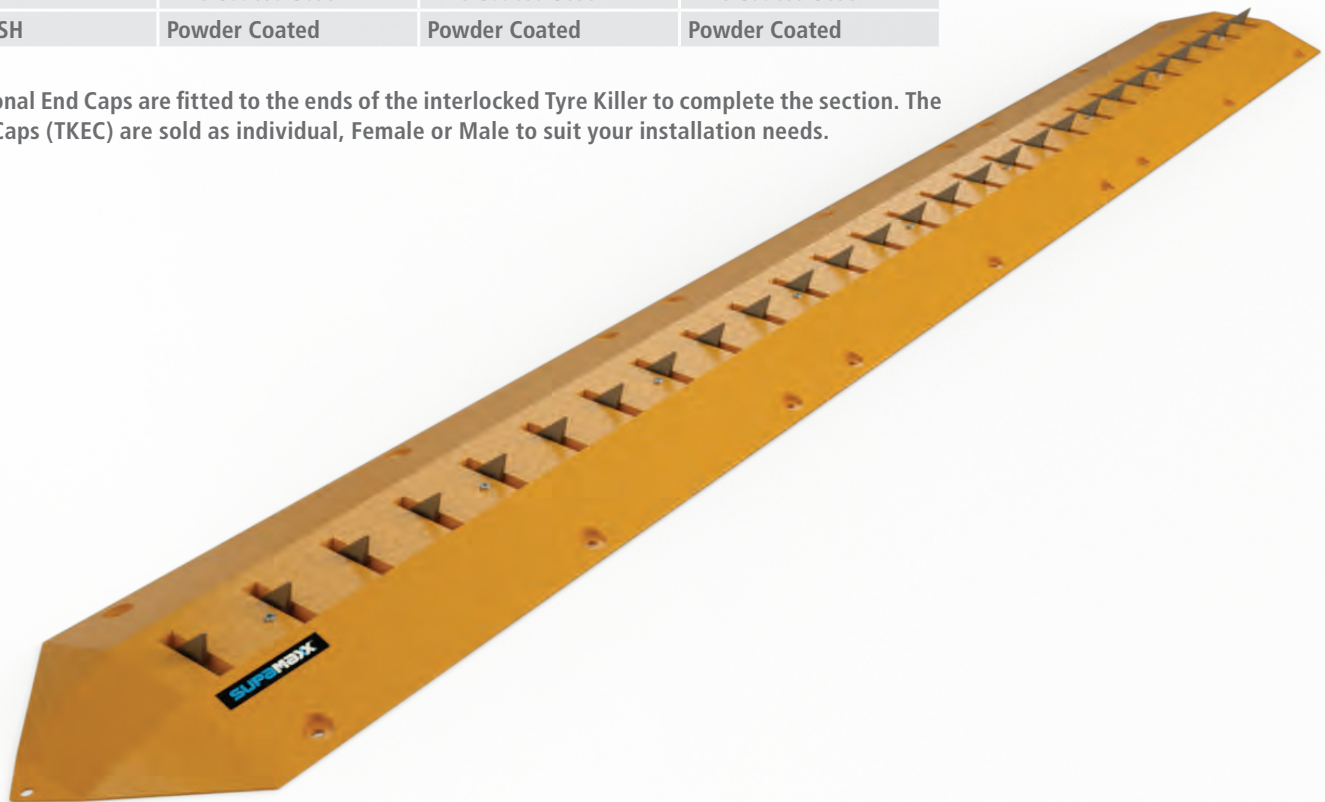

When used in the correct direction, Supamaxx Tyre Killer's independently retracting teeth simply lower when the car moves forward, allowing the vehicle to pass freely. When approached from an unauthorised / opposite direction, the teeth lock up denying access and causing almost certain tyre damage.

COMMONLY USED:

- Commerical Premises
- One way areas
- Restricted Areas

PRODUCT CODE	TK1000	TKEC - Female	TKEC - Male
LENGTH	1000mm	250mm	250mm
