

VERTICAL BICYCLE RACK: BRV102 RANGE

AS2890.3
COMPLIANT

SupamaxxTM BRV102 is a popular dual bicycle rail. As it provides the securing of 2 bicycles per rail, the area footprint required is greatly reduced, making the BRV102 a developers first choice in maximising bicycle parking in the smallest space. This rail has two hanging pins which support the wheel and are designed to allow the bicycle to hang in an upright position, while allowing the owner to secure the frame and wheels using their own locks. This Supamaxx bicycle rail meets Australian Standards AS2890.3:2015 when positioned correctly and can be used towards Green Star points.
